## Maxilift 100 M

The 100M is a 7400 ft lb manual folding crane complete with 2 manual extensions, manual pump for lifting, and a simple release valve. The rotation is by means of a removable crank handle which is connected to a gearbox giving you full control of the rotation so you never have to worry about the load swinging out of control and endangering the operator. Overload protection is also installed to protect the structure of the crane. Built to Next Hydraulics high standard, it incorporates standard Maxilift features such as Domex high tensile steel, hexagonal boom, DIN 15108 Standard an H2 B3 rating.

Better value for money than the opposition

Lifting Capacity : 814 lbs @ 8'10''
