• 2010 ... ARE YOU READY? •

“Helping Keep the Environment Green”

What People Are Saying

"[Transport Canada's] tests are abusive and the standard allows for the use of two tanks; Enviroslip used one. It speaks very highly of their confidence in the durability and integrity of their product."

Richard Keiper, PhD
Western Canadian Testing Inc.

"The quality workmanship on all components is impressive and the tanks' many features help these products sell themselves. These tanks are extremely rugged and they stand up in the harsh climatic conditions in which we operate. Not only do we consider Enviroslip tanks the best in Canada, our customers in Australia agree as well."

Nic Steel, Marketing Manager
Transtank Canada Inc.

2010 ... Are You Ready?

Beginning **January 1, 2010** all Intermediate Bulk Containers (slip tanks) will have to comply with the new Transport Canada regulations (see Transport Canada link at www.enviroslip.ca for complete details). These new rules will render all tanks not UN certified obsolete. Don't wait. Upgrade to a new **Enviroslip Double Walled Tank** now and you know you will be using the best made and safest slip tank on the market today.

Remember, whether it's Diesel, Gasoline or Aviation Fuel, **Enviroslip Double Walled Tanks** are the safest, most environmentally friendly slip tanks on the market.

Box** - Holds Auto-Stop Nozzle and
Helps Keep Box and Nozzle Clean.

All Enviroslip slip tanks are Transport Canada registered (CAN/CGSB-43.146-2002). Available Models: 95, 135-Tall, 135-Short, 165, 500 & 1000 gallon. Custom sizes upon request

Extremely durable double wall design.

Lockable Fill-Spill Box reduces fuel spillage when filling tank.

Triple-plate pump intake to minimize stress fractures.

Pump intake is fitted with pump mount and suction tube with emergency valve.

All caps, hardware and instructions are provided for a quick and easy installation.

Baffled primary tank to reduce sloshing and rocking.

Manufactured with 12-gauge P&O Steel for better weld seams and increased paint adhesion.

Inspected at the factory and ready for service for five years between inspections.
